Your invitation to the Department of Medicine - Western Health Research Expo

As part of Western Health Research Week from 5-6 pm

Venue: Atrium and Lecture Theatre area in the WCHRE Building, Sunshine Hospital, 176 Furlong Road, St Albans

Department of Medicine - Western Health

The Department of Medicine - Western Health conducts high quality research into acute and chronic diseases common in the western suburbs of Melbourne. We are a multidisciplinary group with extensive experience in the design and conduct of large scale, clinical randomised controlled trials, public health and transitional research.

The state-of-the-art facilities at the Western Centre for Health, Research and Education (WCHRE) includes a well-equipped gym, wet lab facilities, imaging (DXA, pQCT, etc.), animal facilities and a translational research unit.

Find out more about what we have to offer.

Join us for fingerfood and drinks on Monday 23 October. You can chat to supervisors and current students about projects and pathways that may lead to fulfilling your career ambitions.

We have a strong team of potential supervisors specialising in all areas of Medicine.

Projects on Offer

We offer projects in the following areas:

* Ageing
* Cardiovascular Diseases
* Cell and Molecular Biology
* Clinical Trials
* Community
* Hormones
* Imaging
* Musculoskeletal
* Neurological Diseases
* Pharmacology
* Public Health
* Respiratory Medicine
* Translational

Your career as a researcher could start at Western! We are always happy to help.

Roman Falls
Master of Philosophy Candidate

I have had the privilege of working under Associate Professor Christopher Neil at the Department of Medicine – Western Health, for the past 18 months. It is an exciting and supportive place to conduct clinical research. Our team is looking at a new therapy to help patients who are suffering from heart failure. Clinical research can be quite challenging at times but can also be very rewarding. I would like to encourage others to pursue their research interests at the University of Melbourne. It is a resourceful and inspiring place to study.
