Curious about Research?

Our Research Scholar program allows you to experience the world of clinical research with a focus on real-world impact in primary care.

You will have the opportunity to:

- Conduct your own research project on a topic of interest
- Work with experienced GP researchers and supervisors
- Conduct a literature review
- Collect, analyse and interpret primary care data and present your findings
- Develop your own identity as an early career clinician researcher

Research Themes

Children and Young People's Health

Mental Health

Domestic & Family Violence

Cancer

Sexual Health

Health & Biomedical Technology

Infectious Diseases
