GRADUATE COURSES IN CLINICAL ULTRASOUND

AT THE #1 UNIVERSITY OF AUSTRALIA

Clinical ultrasound has made a dramatic impact on patient management in peri-operative, critical care, emergency medicine, surgery and internal medicine environments.

An expanding range of clinicians are now using clinical ultrasound, including those in primary care, remote and rural medicine, sports medicine, prehospital/paramedicine, nursing, midwifery, physiotherapy, and other branches of allied health. Developed by the renowned Ultrasound Education Group (UEG), the University of Melbourne's clinical ultrasound courses are tailored to the needs of medical professionals looking to gain the expertise to perform and interpret complex medical ultrasound cases within their clinical practice.

Throughout this course, you will focus on 3D echocardiography and new technologies such as Intra-cardiac Echo (ICE). Other topics include congenital, obstetric and medical conditions. A major focus is on research methods and ultrasound literature. You will conclude with advanced case studies practicum, to demonstrate your knowledge of a range of complex cases.

Our clinical ultrasound suite features the only fully online Australian university courses that allow you to gain Continuing Professional Development (CPD) points while building towards an award qualification.

3 new elective subjects in semester 2, 2020

- Vessels Nerves Lungs & Musculoskeletal
- Abdominal & Peri Arrest Ultrasound
- Obstetrics Gynaecology & Practicum

Practice

Guided practice on simulators

Convenience

Online course materials
Study on web or mobile

Reinforcement

Online tutorial assessments
and case studies

Recognition

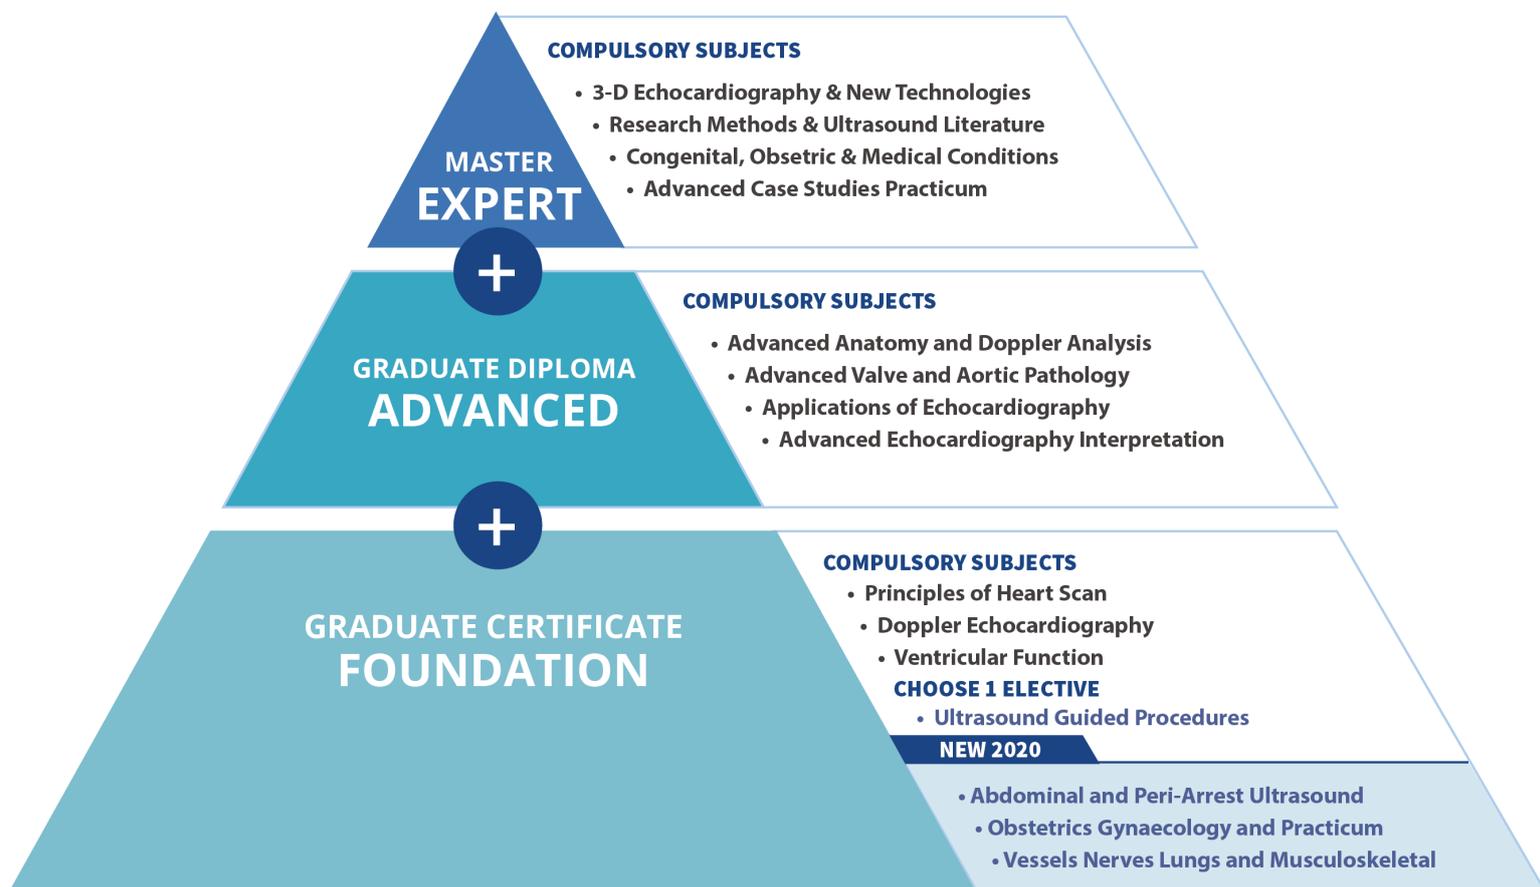

Testamur issued upon
course completion

COURSE INFORMATION

Each course is offered part-time (2 subjects) over two semesters or full-time (4 subjects) over one semester.

🕒 **PART TIME:** 10 – 12 HOURS PER WEEK **FULL TIME:** 20 – 24 HOURS PER WEEK

Student Testimonial

“My study experience has been excellent. The support I received from faculty was great - whenever I made specific comments or feedback I would receive a reply quickly, usually from whomever had developed the teaching case. When I was travelling, the course content was easy to access on my iPad from overseas. Although a degree of content focuses on cardiac anaesthesia, as an emergency medicine and retrieval doctor I found the study stimulating, enjoyable, and directly relevant to my daily practice.”

— **Dr Thomas Brough**, Emergency Medicine Registrar
Current Student, Master of Clinical Ultrasound
