

THE UNIVERSITY OF
MELBOURNE

Do you think a computerised tool could facilitate optimal STI care in general practice?

—
School of Population
and Global Health

We would like to hear from you!

Who we are looking for:

- Sexual Health Physicians
- General Practitioners
- General Practice Nurses

This study aims to explore how a computerised tool may facilitate optimal STI care in general practice. The results of this study will inform the design of a computerised tool that integrates with the electronic medical record to support decision making in STI testing and care.

This study will involve a 30–45 minute telephone or Zoom interview with a University of Melbourne student researcher.

If you are interested in participating and would like more information, please contact Honours student Mel on:
mgezer@student.unimelb.edu.au

This project is being supervised by Dr Jane Goller and Dr Barbara Hunter from the University of Melbourne's School of Population and Global Health and Department of General practice.

This study has been approved by the University of Melbourne Human Ethics Committee, ID: 21874
