## Highly Cited Researchers 2015

Highly Cited Researchers 2015 represents some of world's most influential scientific minds. About three thousand researchers earned this distinction by writing the greatest number of reports officially designated by Essential Science Indicators as Highly Cited Papers — ranking among the top 1% most cited for their subject field and year of publication, earning them the mark of exceptional impact.

### The 2015 Highly Cited Researcher list will be open for feedback until December 1, 2015.

To update your primary or secondary affiliation, please contact us at [Tech Support](#). As part of your request, please be sure to include your full name and your institutional email address as well as one of the following:

- ResearcherID, ORCID, Google Scholar profile that publicly displays your preferred affiliation.
- A public webpage that describes your connection with the institution, such as a lab, working group, departmental or faculty website.
- A press release or webpage from your preferred affiliation that describes your connection with the institution.

No updates will be accepted for the 2014 and 2001 lists, which will remain available in the Archives section. Only updates for 2015 will be accepted. After December 1 we will be unable to accept additional updates to the information, so please [contact us](#) to confirm that we have listed your correct institutional affiliations as soon as possible.

## IS THE PETROLEUM INDUSTRY ABOVE GOING GREEN?

In the environmentally conscious world of the 21st century, it seems counter-intuitive that global greenhouse gas emissions have risen 35% since 1990, according to the U.S. Environmental Protection Agency (EPA).
