2018 Honours Students

Department of General Practice

Honours 2019

Why do Honours with us?

If you are interested in working with people and you would like to make a difference to the way primary care is delivered in the community, then this is the place for you!

The Department of General Practice teaches medical students, practice nurses and research students. The Department is home to the Primary Care Research Unit which was established in 2006 as a centre for excellence in primary care research, research training and knowledge exchange.

From its base in Parkville and our nodes at Sunshine and Northern Hospitals, the Department reaches out into the community, liaising with almost 500 rural and metropolitan general practices and 300 community health centres for teaching and research.

Our Honours students are provided with

- Excellent access to the Department and its facilities
- Supervision by some of the leading primary care researchers in Australia
- The opportunity to meet international researchers hosted by the Department

Projects

Staff at the Department conduct research on a wide variety of topics using an array of different methodologies. Research areas include:

- Cancer in Primary Care
- Children and Young People's Health
- Diabetes and Cardio-Metabolic Conditions
- Integrated Mental Health
- Sexual Abuse and Family Violence: SAFE
- Sexual Health
- Indigenous Health
- Social Inequalities
- Health Services Research
- and much more ...

Some of our projects require students to be based in primary care settings, such as community health centres. Details of projects are available at medicine.unimelb.edu.au/school-structure/general-practice/study/honours

“We offer a variety of research projects, but if you have a passion for a particular area, we may be able to design a project around your interests.”

2017 Honours Students

What is involved in the Honours year?

The aim of the Honours year is for students to complete a small study under the supervision of an experienced researcher. The Honours year has two components – coursework (25%) and a research project (75%).

Where can Honours lead?

Honours degrees from The University of Melbourne are highly prestigious and distinguish these graduates from others in the workplace. After Honours, students may choose to complete a Graduate Research degree such as a Masters by Research or a PhD, or to be employed to work on a research program in the university or institute. Others may seek employment in the primary care sector, public health, government or community based organisations.

Want to know more?

COME TO OUR INFORMATION SESSION

Date – Wednesday, 19 September 2018

Time – 4:00pm – 5:30pm

Venue – Boardroom, Department of General Practice, 200 Berkeley Street, Carlton
