The **diamond** study has been awarded 10 years of consecutive funding from the National Health and Medical Research Council (IDs 299869, 454463, 566511 and 1002908). Initial pilot funding was received from beyondblue Victorian Centre of Excellence in Depression and Anxiety (bbVCoE), a collaborative initiative with the Victorian Government. The Computer Assisted Telephone Interview conducted in year 1 was funded by a Stream 3 Grant from the Australian Primary Health Care Research Institute (APHCRI). The **diamond** Genetic sub-study that included the collection of DNA and genotyping was funded by the LEW Carty Charitable Fund (ID 7284).
